The mystery of life and death has puzzled many a wise man. The alchemists of old searched in vain for some combination of drugs that would prolong life indefinitely. Common sense, chemistry and medical science have combined in this age to show man the way to a long and healthy life.

Common sense teaches that a man should not over-work or over-worry; that he should take ample time for his meals, for resting and for recreation and sleep; that he should not neglect the little ills of life, because they are the precursors of serious and fatal maladies. Chemistry has enabled men to make combinations of drugs that were impossible in the days of the alchemists. Medical science has taught when, how and why these combinations of drugs should be used. Dr. Pierce's Golden Medical Discovery is the most valuable of all health-restoring medicines, and the most effective. Its first work is upon the fountain-head of life—the stomach. A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improvidently and insufficiently nourished. This medicine makes the stomach strong, facilitates the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-builder, flesh builder and nerve tonic. It makes men live in body, active in mind and cool in judgment.

It does not make flabby fat, but solid, muscular flesh, nerve force and vital energy. All nervous disorders are cured.

W. Jordan, 101 Court, Whittier, Co., Ky., writes: "One two and a half weeks ago I was taken very severe pains in the chest, began to spit up blood was I filled with night-sweats and was so bent up that I could hardly walk half a mile. Then Dr. Pierce's Great Medical Discovery and have improved both in strength and health."

The medicine dealer who urges some substitute is thinking of the larger profit he'll make and not of your best good.

"Three dollars," was the reply.

"Take it away," commanded Washington rather sharply. "I will not encourage such extravagance in my house."

Not Good Form.

Many an originally honest man has been labeled rogue for endeavoring to fly high in localities where the flying was not good.—Scranton Tribune.

Humming birds are domesticated by placing in their cages a number of paper flowers of tubular form containing a small quantity of sugar and water, which must be frequently renewed. Of this liquid the birds partake and quickly become apparently contented with their captivity.

On an average every woman carries 40 to 60 miles of hair upon her head.

## NEAL AND CARTER.

Captain Jack Neal was court-martialed for embezzling money from the canteen fund of his regiment, and the findings were promptly approved at Washington. That was right. Although the amount taken was small and the deficiency was made good prior to the trial, he had, however, violated his trust and soldierly honor, and was justly dismissed in disgrace from the United States service.

But what a difference in the case of Captain Oberlin M. Carter, who, a year and a half ago, was found guilty by court-martial of having stolen one and a half millions from the United States government by forging warrants on the treasury, and who was sentenced to dismissal from the army, to five years imprisonment and to the publication for one year of the story of his disgrace, is enjoying a life of luxury and ease upon the stolen money in New York, drawing full pay, and supremely confident, apparently, that he will escape the penalty of his crime.

He lives at the magnificent home of the New York Athletic Club, where he is the favorite with most exclusive circles and spends with a lavish hand the money he stole from the people. He dresses in the latest fashion, dines at the most expensive restaurants, is received in what is considered the best society, and is a leader of the sports popular with his "swell" associates. With no labor to perform, and all the enjoyments of life within his reach, this notorious criminal is supported in his ease by the federal government which he plundered, although a review of the case by the ablest lawyers in the country and by the Attorney General, has failed to reveal a slightest flaw in the finding or sentence of the court that tried him.

This arrogant scoundrel, it is reported, openly boasts that his friends in high official position will protect him. He does not say who these friends are, but it has been evident for months that he has a powerful hold on some of the men who manage affairs at Washington. A year and a half is a long time for a criminal to go unpunished, and a popular demand for an explanation of this mysterious delay of justice is doubtless sounding unpleasantly in the ears of the administration. The American people cannot be trifled with and imposed upon indefinitely, and it is barely possible that Captain Carter's "pull" may constitute one of the issues in the next campaign.

The cases of Captain Neal and Captain Carter should serve as a profitable lesson to military men of "taking" propensities to never steal any less than a million and a half dollars, and even then to make sure before hand that they have friends in political life who will avert the consequences of their thievery.

The shooting of M. Labori, counsel for Captain Dreyfus, whether done by irresponsible parties or by partisans of General Mercier in execution of a diabolical plot, ought to cap the climax of condemnation for the anti-Dreyfusians. Had there been any doubt of the verdict of the court martial, that dastardly deed ought to have removed it and to destroy what little sentiment there is remaining throughout the republic in opposition to the cause of the prisoner and of outraged French justice.

Why not say mortgages have increased in Nebraska in the last fifty years? The argument would be as pertinent as to say they have increased in the last nine years. The claim Republican papers make is that they have decreased, and very materially, in the last two years.—*Gazette*.

The Republican papers then state what is not a fact. The mortgage aggregate is larger this minute than at any time within the history of the State. Give us a harder one.

Tom Reed has resigned as a member of Congress. He is at open war with the administration in its Philippine policy, and the indications are that he will be found under the Bryan banner in 1900. His resignation is significant. He evidently wants to be in position to consistently oppose the re-election of McKinley.

As there is not one particle of evidence against Dreyfus, it is extremely probable that he will be found guilty. That has been too often the way of the world since the days in Jerusalem, when the Lowly One was crucified for the crime of being sinless.—*Sacramento Bee*.

A NEWSPAPERMAN is supposed to be a bureau of information. He is presumed to know everything, but sometimes he doesn't. Such is our case in the matter of liquid air, and we will have to study it up before we can answer intelligently the daily questions propounded to us regarding its constituent parts, process of manufacture, use, etc. We know that air is composed of nitrogen and a small proportion of oxygen and the process of liquification is mainly by compression, although it may be partly chemical. The manufacture of it in sufficient quantities to render it profitable, is as yet experimental. It is intended to take the place of ice for refrigerating purposes. For further information apply to our neighbor on Rue de Virginia, who knows everything from who will be the next Governor to the date of the commencement of the twentieth century.

The Carson Appeal has recently published some excellent articles upon the tariff and strongly in condemnation of the Dingley law. Our memory must be again at fault, as we were under the impression that the Carson paper supported a man for U. S. Senator who voted for that objectionable statute, and without whose vote it could not have been passed.

## Letter from Reno.

The following letter from Reno is published in the Malden (Mass.) Evening Mail of August 15th:

Mr. Editor: Reno, Nevada, is the largest town in the State. The population is over 5,000. It is quite a railroad center. There are three railroads in the town—the Central Pacific, Virginia & Truckee, and the Nevada, California & Oregon railway lines. It is the trading point for a large surrounding country. It is the headquarters for cattle and sheep owners, many of them owning stock ranches outside, but whose families reside in the town. Reno has many large mercantile establishments, saloons galore and two banks whose capital and deposits run into the hundreds of thousands of dollars. The State University, located here, causes the Renoites to go into ecstasies. The buildings of the University are small, yet they are well equipped and have as able a staff of educators as can be found in any of the universities in this country. There is a large number of graduates turned out annually by electric power at the University. One of the graduates who earned his tuition fees at cow punching was unable to graduate until he was 35 years of age. A friend of his jocosely remarked that he graduated rather late in the day. The cowboy graduate replied good humoredly that he was an electric graduate, and that he received his diploma "just as the sun went down."

EDWARD J. MURRAY.  
Reno, Nev., Aug. 9, 1899.

## Bartlett Springs Water.

The Reno Mercantile Company is doing a land office business in hardware, groceries, provisions and especially in the Bartlett Springs Water trade. The company is sole agent for that celebrated water which is used at all first class hotels in the United States. It is growing in popularity every day and is away in the lead of all other mineral waters, not only on the Pacific coast but all over the Union. It retains its mineral qualities indefinitely after bottling, and is as palatable and refreshing after years in glass as when first taken from the Springs. A case of it will answer the same purpose as a visit to its fountain head which is one of the most popular resorts for health seekers on the American Continent.

It will relieve the poor little sufferer immediately. Depend upon it mothers there is no mistake about it. It cures Diarrhea regulates the Stomach and Bowels, cures Wind Colic, softens the gums, reduces Inflammation and gives Tone and Energy to the whole system. Mrs. Winslow's Soothing Syrup for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price 25 cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup." 4-yl.

## Mines May be Sold.

County Clerk Porter yesterday completed drawing up an abstract of certain mines in Olinghouse canyon for Thomas Parrish of Colorado Springs. The mines included in the abstract are the Hutchinson, Golden Eagle, Jennie C., Jennie C. extension, Forlorn Hope, Ora, Ora extension and the Ora mill site. While the parties negotiating for the purchase are reserved, it is thought that a transfer will be made in the near future.

## They Lasted Quick.

## When to Stop ... and Milk.

"People over 50 would do well to give up milk and eggs as a diet," said Dr. Henry M. Dearborn. "These are the structure forming foods of animals which mature in a short time, and when taken in quantities by human beings whose structures have already formed they tend only to the hardening and aging of the tissues."

Dr. Dearborn said that he had seen people who were beginning to find stair climbing difficult and who were losing their elasticity much benefited by eliminating these articles from their diet. "There has been a great increase in the duration of life below the age of 50, statistics prove," he said, "but beyond that period there has been no improvement." In his opinion, the person over 50 should have as good a chance to preserve life as the young child just beginning its struggle with existence.—New York Times.

## Pig Bone Bracelets.

The natives of the New Hebrides Islands, in the Pacific ocean, raise pigs for bracelets. The upper canine teeth of the pigs are removed, and that gives the lower tusks a chance to grow as much as they wish. The lower teeth grow, and finding no resistance, attain a good length. The teeth grow in a spiral, and the tip often lies beside the root of the tooth. Very rarely the point grows into the root of the tooth and makes a complete circle. A complete pig tooth bracelet is a very valuable jewel, which is worn around the wrist or attached to a string around the throat.—San Francisco Call.

## ASTOWAWAYSLEUTH

ODD VOCATION OF AN OLD SAN FRANCISCO BOATMAN.

He Runs His Prey to Water Instead of to Earth—How the Stowaways Get Aboard Ship and How They Generally Come to Grief.

Down by the city's sea wall a queer man pursues a queer vocation. He is a water front "character" and his business is the sleuthing of stowaways.

He doesn't run his prey to earth, however, after the manner of other hunters of human game. He runs it to water.

This weather hardened, wrinkled man is at once the terror and the friend of would be stowaways. He is known as Captain Jack, but his name has half a dozen variations, all of which smack of the salt, salt sea. These are some of his aliases: Wharf Rat, Water Fowl, Sea Dog, Whaler, Old Man Jack and The Boatman.

His stock in trade consists of his shrewdness in "spotting a stow" and a battered but seaworthy old boat which rides the water by night and day through successive seasons. The town's attractions do not lure him from his long accustomed haunts among the masts, figureheads, piers and piles, gals, nets, stringers and multitudinous varieties of merchandise that crowd the bay's edge.

Captain Jack came out of his shell of reserve long enough the other day to tell a bit of what he knows about that venturesome creature of chance, the stowaway, who would sail voyage out of port without the previous formality of paying for passenger privileges.

"I've been in this business a long time," he said, "an' I can gen'rally spot a stow."

"Different ones has different methods. Some hangs round the docks afore a ship sails, offerin' to lend a hand, or proposin' to work a passage somewhere. When they find this don't go the way they want it to, they commence to talk big—inquire 'bout sea weather, the cost of a cruise, the time it takes to git to the islands or Alaska or Panama. They're always just a-goin' to make the trip. But there's somethin' so hungry an homesick an tired lookin' about 'em that it gives 'em dead away—leastways it does to a person who's spent a good many years studyin' their kind."

"Others, though, wait till the last minute, then come hustlin' along as if they was too rushed to buy a ticket or as if they had one in their pocket. Why, I've even been asked by 'em to row 'em out to a ship after she'd got clear out into the stream. If a skipper happens to be good natured, he'll slack up an take passengers aboard. An after all that bother I've had to bring 'em back again, for nary a red did they have."

"This class of deadheads is gen'rally supplied with clothes, gripsacks, batboxes, steamer trunks, canes, umbrellas, cameras, foldin' chairs an sometimes a servant."

"Not valet?"

"Sure. That's what we sailors call puttin' on a terrible lot of dog. Them's the fellers that always has friends 'mong guvnors, rajahs, lords, dukes an consuls, an likewise money to burn—but always across the water somewhere. I don't mind the men, but I hate to tackle a woman."

"Women stowaways?"

"Sure. When the Klondike boom was on, I used to bring in as many women as men. Some was only girls—little slim things, goin' to the icy gold mines with no more outfit than the thin clothes they stood in."

"The easiest part of the stow's plan in makin' an escape is the gittin' aboard. Nobody knows who's who on the day a ship's leavin' port. If she's crowded so much the better. The stow can hide in the hold without bein' spied. But it's mighty hard to git past the Heads, for by that time the ship's been searched an the stows yanked out on deck."

Captain Jack spoke truly. The stowaway who passes the Heads has run the gauntlet safely—unless an incoming vessel be at hand to convey the intruder back again.

When the final gong has been sounded, the warning "All visitors ashore!" given, the gangplank withdrawn, the last rope loosened and the screw turned, the vessel's interior is carefully explored. Meanwhile Captain Jack's weather beaten boat is speedin' in its wake. If a stowaway be discovered a signal is sent from the pilot's bridge and Captain Jack is quickly alongside. A rope ladder is lowered, and toward it the purser or other officer and his aids escort the discomfited "stow."

"Every day," continued Jack, "I fetch in men women that want to git away. They're broke, an thought they'd try their luck in some other place. I lump most of 'em off at Meiggs' wharf. It's a heap easier for me an for the stows. There

A. R. De Fluent, editor of the Journal, Doyleston, Ohio, suffered for a number of years from rheumatism in his right shoulder and side. He says: "My right arm at times was entirely useless. I tried Chamberlain's Pain Balm and was surprised to receive relief almost immediately. The pain balm has been a constant companion of mine ever since and it never fails." For sale by W. Pinniger.

"We have saved many doctor bills since we began using Chamberlain's Cough Remedy in our home. We keep a bottle open all the time and whenever any of my family or myself begin to catch cold we begin to use the cough remedy, and as a result we never have to send away for a doctor and incur a large doctor bill, for Chamberlain's Cough Remedy never fails to cure. It is certainly a medicine of great merit and worth."—D. S. Meekle, general merchant and farmer, Mattie, Bedford county, Pa. For sale by W. Pinniger.

It is very hard to stand idly by and see our dear ones suffer while awaiting the arrival of the doctor. An Albany, N. Y., dairyman called at a drug store there for a doctor to come and see his child, then very sick with croup. Not finding the doctor in, he left word for him to come at once on his return. He also bought a bottle of Chamberlain's Cough Remedy, which he hoped would give some relief until the doctor should arrive. In a few hours he returned, saying the doctor need not come, as the child was much better. The druggist, Mr. Otto Scholz, says the family has since recommended Chamberlain's Cough Remedy to their neighbors and friends until he has a constant demand for it from that part of the country. For sale by W. Pinniger.

## FAST HORSES WILL RUN

### Twenty-five Racers in Training.

#### MANY MORE ARE COMING TO RENO.

#### The Track is in Good Condition—Some Horses, Pedigrees and Records.

Twenty-five race horses are stabled at the Reno track awaiting the coming State Fair. They include many first class sprinters and long distance runners. Of the 25, twenty are runners, two trotters and three pacers.

The track is in splendid condition, in fact never has been better than now. Horses are making good time upon it, and racing judges are of the opinion that previous records will be broken upon it this year.

A few of the runners were looked at yesterday by a JOURNAL reporter. Following is a partial list of them, which will give a fair idea of what kind of stock will step on the track next fair week.

Kathleen—Short distance runner. When a colt did some pretty work at Ingleside. Owner, Joe Rose, also has three promising colts and a half sister to Silver State, property of Mr. Thompson, which he is training on the Reno track.

Drommer—Rauner owned by Dan O'Keefe. Has a record for seven-eighths of a mile in 1:30.

La Banos Kid—Short distance sprinter owned by Ed Baker of Bodie, has done a half mile in 49 seconds and the three-eighths is 35 $\frac{1}{2}$ . Bought of Denio last year by Baker.

Miss Spiro—Sired by Autio, dam Katie H. by General Benton. This mare belongs to S. Francovich of Reno and was bred on the Stanford farm, Palo Alto; made a mile in 2:30 at State fair at Sacramento in 1897. She is doing well on the track this year and will probably beat 2:25. Color, dark brown, age 5 years.

Sport McAllister—Owned by Lang and Brock. Sired by Friar Frick, dam Twilight by Norfolk, was reared by Miss Langtry on Langtry farm in Lake county. Records, seven-eighths in 1:26 $\frac{1}{2}$ , one-half in 47, five-eighths in 59 $\frac{1}{2}$ . At Futurity course ran the short three-fourths in 1:10 $\frac{1}{2}$ , has made full three-fourths in 1:12 $\frac{1}{2}$ . The Futurity record was made with a weight of 126 pounds on her back. She is perhaps one of the best sprinters in the stable.

Durango—Sire, Duke of Norfolk, dam May D. Owned and handled by E. F. Hobart of Kern county, California. This horse is showing up well on the track this season, and it is predicted that he will surprise some racing authorities, although he has a fair record as a long distance heat horse.

Mafada—Sire Neban, dam Manzanita. Well known short race sprinter. Has made three-eighths in 35 $\frac{1}{2}$  and one-half in 48 $\frac{1}{2}$ .

Mandamus—Sorrel two-year old. Has been entered for the Shafter Selling Stake at the State fair at Sacramento. This stake is about \$1000. Mandamus will be taken down in about a week together with Mafada, Durango, Skirmish and Sport McAllister, but all will be back in time for the races here, where Mandamus is entered in all the two-year-old races.

Mandamus' sire is El Rio Rey, and dam is Miss Grant, formerly Mademoiselle Filly. The colt was bred at Durango, Skirmish and Sport McAllister, but all will be back in time for the races here, where Mandamus is entered in all the two-year-old races.

The Carson Appeal says that Charley Wallace was driven away from Lake Tahoe on account of the exactions of fashions.

The JOURNAL would respectfully suggest that the State Central Committees of the different political parties next year require that the delegates to the conventions appear in swallow-tailed coats with all the other appointments to "full dress," and that they be compelled to exhibit certificates of good standing in the local four hundred, as prerequisites to their participation in the proceedings in the conventions.

**A Lie in Its Travels.**

There is an item going the rounds of the State papers that there are twenty-seven cases of typhoid fever in Reno. The item is untrue. There are quite a number of malarial fever cases here, but only two or three cases of typhoid. Furthermore, there is as little sickness in proportion to the population in Reno as in any town in the State. There has never been a time this season when there were more than five cases of typhoid in the town.

#### GOING AND COMING.

The Difference Between the Early and Late Volunteers.

An idea of the class of the soldiers who volunteered for the Cuban war and those who have lately enlisted can be formed by interviewing the porters on the Southern Pacific passenger trains. One of them informed a JOURNAL reporter that there could scarcely be greater difference between those going west, en route for Manila, and those returning from the islands, if they were different species of animal life. The westward bound men are as a rule of the worst class, drunken, noisy and up to all kinds of meanness, and generally worse than the average hobo who patronizes the brakebeam. They delight in making disturbances and render themselves nuisances on the trains.

On the other hand, the returning

#### HOMeward Bound.

Pennsylvania Soldiers Go Through Reno.

Yesterday the Tenth Regiment of Pennsylvania Volunteers passed through Reno on the way back to their native State. Three long trains, bearing eight companies in all, passed

during the afternoon. They were mustered out in San Francisco, where they

have been for the last three weeks since returning from the seat of war.

The boys all look well after their hard campaign, but thirty-seven of them

were left dead on the islands, victims of deadly Mauser bullets and disease.

A JOURNAL reporter approached a junior officer, and in the course of a conversation asked him how the soldiers as a body regarded General Otis.

The officer hesitated, but at last replied: "To tell the frank truth, Otis

is not giving satisfaction. Although

the press accounts of his incompetency are grossly exaggerated, it is true

that a more energetic man should be placed in control of the situation."

The reporter made several inquiries

about the Nevada cavalry, and at last

found a private who had fought beside them under General Wheaton.

"Them Nevada chaps ain't afraid of nothin'," he said in language ungrammatical, but forcible. "They are just as good fighters as any company in the Tenth Pennsylvania, and that's sayin' a whole lot."

The regiment will be given a grand

reception on their arrival at Pittsburgh

on the 28th instant, over \$7,500 having

been subscribed for that purpose.

**His Life Was Saved.**

Mr. J. E. Lilly, a prominent citizen of Hannibal, Mo., lately had a wonderful

deliverance from a frightful death.

In telling of it he says: "I was taken

with Typhoid Fever, that ran into

Pneumonia. My lungs became herd-

ened. I was so weak I couldn't even

sit up in bed. Nothing helped me.

I expected to soon die of Consumption,

when I heard of Dr. King's New Dis-

covery.

clothes.
